

THE ADVANCED SOLUTION FOR CHALLENGING AESTHETICS

Cellulite is one of the top concerns of medical aesthetic patients. 90% of women and over 10% of men complain about stubborn, unsightly cellulite.

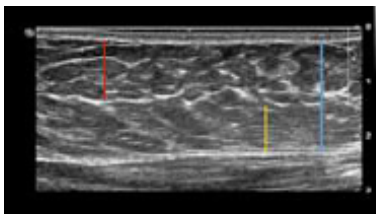

Venus Legacy™ is the ideal device for cellulite reduction. Powered by patented (MP)² technology, which combines Multi-Polar Radio Frequency and Pulsed Electro Magnetic Fields, Venus Legacy™ simultaneously shrinks fat cells and revitalizes collagen.

Earlier this year, top international dermatologists demonstrated that Venus Legacy™'s patented (MP)² technology is effective in significantly reducing abdominal cellulite. Patients were very satisfied with the results and experienced no adverse effects. The results showed:

- Reduction in subcutaneous abdominal thickness on the axial and sagittal plane.
- Average abdominal circumferential reduction of 3.78 cm over the course of the study.
- At 1, 4, and 12 weeks following the final treatment, assessments showed significant improvement in cellulite appearance.

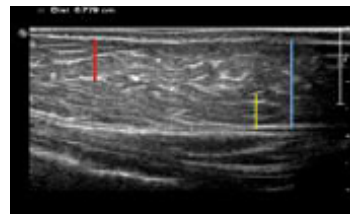

AXIAL PLANE

Before

■	: cellulite	0.870 cm
■	: fat	0.936 cm
■	: subcutaneous fat	1.810 cm

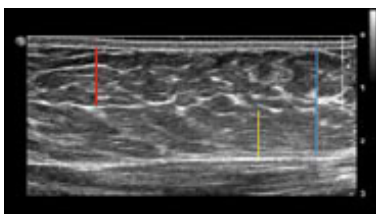

1 Week after Complete Treatment

■	: cellulite	0.621 cm
■	: fat	0.739 cm
■	: subcutaneous fat	1.410 cm

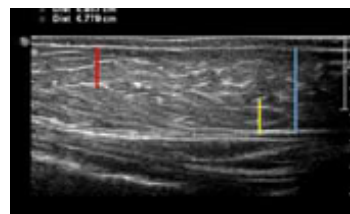

SAGITTAL PLANE

Before

■	: cellulite	1.010 cm
■	: fat	1.040 cm
■	: subcutaneous fat	2.060 cm

1 Week after Complete Treatment

■	: cellulite	0.857 cm
■	: fat	0.779 cm
■	: subcutaneous fat	1.640 cm

Venus Legacy™ offers the most advanced solution, not only for cellulite reduction, but also for body contouring*, skin tightening*, and wrinkle reduction. Powered by patented (MP)² with innovative VariPulse™, the technology is safe for all skin types, and treatments pose no downtime. It is an essential system for the success of your aesthetic business.
